CALCUL SIMPLE DE COTES

Cote d'amélioration

Cette notion répond à la question de savoir : quelles sont les chances que mon jeu s'améliore après le flop ?

Calcul

Avec une formule plus précise et pas beaucoup plus compliquée que celle de la « règle du 2 et du 4 »

Au flop:

Pourcentage d'amélioration turn + river = **(Nombre d'outs x 3) + 8**

Au turn

Pourcentage d'amélioration river = **(Nombre d'outs x 2) + 2**

Cote du pot

Calculer **directement** la cote du pot **en pourcentage** afin de la comparer à la cote d'amélioration.

Formule de la cote du pot en pourcentage:

- **mise à suivre / (pot avec mise de vilain + mise à suivre) x100** ou si vous préférez: mise à suivre / (pot brut + mise à suivre x2) x100

Exemple:

- après l'action preflop, la taille du pot est de 60€ et votre adversaire mise 30€, la taille du pot est à présent de 90€.

Dans ce cas précis, vous devrez payer 30€ pour un pot qui fera 120€ après votre call soit $30/120 = 0,25$ et $0,25 \times 100 = 25\%$

Comparaison et décision

Vous devez comparer la cote d'amélioration avec la cote du pot, sur le long terme vous serez gagnants en respectant la règle suivante:

- **votre cote d'amélioration doit être supérieure à la cote du pot.**

Conclusion

Si **cote d'amélioration > cote du pot**, il vous **faut suivre** car vous payerez les cartes un prix raisonnable par rapport à la probabilité qu'elles vous fassent gagner le pot.

Si **cote d'amélioration < cote du pot**, votre adversaire veut vous faire payer **trop cher** la turn ou la river par rapport à vos chances de toucher un out (**cependant dans certains spots pensez à prendre en compte la cote implicite**).
